Section 2: Experimental Information						
Number of Hybridisations in Experiment:	*					
Array type(s):	*					
Samples provided & quantity:	* <input type="checkbox"/> Total RNA	<input type="checkbox"/> Labelled cRNA	<input type="checkbox"/> Fragmented cRNA			
Protocol used: <small>(for cRNA and labelled cRNA only e.g ENZO, Affymetrix one-cycle, Ambion etc)</small>	*					
PROTOCOL INFORMATION IS ESSENTIAL AS IS REQUIRED TO ENSURE APPROPRIATE HYBRIDISATION COCKTAIL AND WASH PROTCOLS ARE USED						
Type of Experiment: <small>(e.g comparison of normal vs diseased tissue, time course or to study effects of a gene knockout)</small>						
Experimental Factors: <small>(parameters or conditions tested such as time, dose or genetic variation)</small>						
<p>Comparisons (GCOS) <small>(relationships between all samples, arrays & hybridizations, whether to a standard reference sample or between experimental samples) complete table below:</small></p> <p>PLEASE NOTE THESE COME AT AN ADDITIONAL COST OF £36 PER COMPARISON</p>
